

ASHLEY DIBUDUO

AI PRODUCT & SOLUTIONS SPECIALIST

VANCOUVER, BC · ASHLEYDI.DEV@GMAIL.COM · LINKEDIN.COM/IN/ASHLEYDIBUDUO · GITHUB.COM/ASHLEYDI-DEV · ASHLEYDIBUDUO.CA

AI Product & Solutions Specialist with experience identifying business problems, designing user-centered solutions, and building products, workflows, and AI-powered automations. Combines hands-on technical implementation in React, Supabase, n8n, and Claude Code with 15 years of operational leadership translating complex systems into practical outcomes. Skilled at bridging technical and non-technical teams, aligning stakeholder needs, and turning ideas into scalable solutions. Expected to complete a Diploma in New Media Design & Web Development from BCIT in July 2026.

DIGITAL PRODUCT EXPERIENCE

AI Agent Developer – Wayfair Externship

May 2026 – Present

Extern · Wayfair AI Agent Engineering For Business Intelligence

Remote

- Built marketing-automation and market-intelligence workflows in n8n using Gemini, Mistral, and Hugging Face — automating market research, trend analysis, and creative asset generation to drive scale and efficiency for marketing operations.
- Built a Market Intelligence Dashboard aggregating product, social, and content signals from Amazon listings, Instagram, Pinterest, blogs, and API-driven data sources into a centralized decision-support system for trend monitoring and opportunity identification.
- Developed a Moodboard Agent that transforms high-level creative inputs into structured prompts and generates visual moodboards through an AI-powered workflow integrating Gemini and Hugging Face.
- Evaluated workflow outputs, refined prompts, and tested AI agent performance to improve relevance, usability, and insight quality.

SEO/AEO Intern

May 2026 – Present

Roswell NYC · Webby Award-Winning eCommerce Agency

Remote

- Built an LLM-powered knowledge base in Obsidian with Claude Code — a self-reinforcing wiki that ingests new research and client data to compound into a smarter reference resource the more it is fed.
- Conduct AI search and discoverability research for enterprise and mid-market ecommerce brands, identifying technical and content opportunities to improve visibility across emerging AI-powered search experiences.
- Run technical SEO audits, schema implementation, and search-performance analysis using Ahrefs, Semrush, Triple Whale, Claude, and Gemini to improve discoverability across traditional and AI-powered search.
- Embedded within the marketing team, working across Shopify, analytics, and search tooling to turn store and discoverability data into actionable insights for ecommerce brands.
- Develop operational checklists and workflows that standardize SEO/AEO execution and improve efficiency across client engagements.

Project Manager — UX Research & Product Delivery

Oct – Dec 2025

FireWatch BC Wildfire App · Academic Project (BCIT)

Vancouver, BC

- Led product discovery efforts including user surveys, journey mapping, moderated usability testing, and research synthesis to identify key barriers to wildfire preparedness and emergency response confidence.
- Created testing plans, moderated usability sessions, and produced stakeholder-facing reports that translated user insights into actionable product recommendations.
- Synthesized research findings into prioritized MVP decisions, including real-time mapping, community updates, and offline access, based on user needs and stress-context usability considerations.
- Coordinated an 8-sprint Lean UX delivery cycle from discovery through validated prototype, ensuring all research, testing, and delivery milestones were completed on schedule.

Product Owner & Scrum Master

May – Jun 2025

Velvet Room Restaurant Website · Academic Project (BCIT)

Vancouver, BC

- Served as Product Owner and Scrum Master for a 5-person cross-functional team, managing a 30-task backlog through a 5-sprint Agile delivery cycle completed ahead of estimated effort (42.4h actual vs. 58h estimated).

- Collaborated with stakeholders and teammates to define and prioritize 30+ user stories across 6 epics, balancing user needs, project scope, and delivery timelines.
- Facilitated sprint planning, reviews, and retrospectives while coordinating design, content, development, and reporting workstreams to maintain sprint commitments and project momentum.

Project Manager — Waterfall Delivery

Jul – Aug 2025

La Notte Brand & App Concept · Academic Project (BCIT)

Vancouver, BC

- Led a 5-person team through five sequential project phases, coordinating scope, timelines, and deliverables using a structured Waterfall approach.
- Developed and maintained project planning artifacts including WBS and Gantt charts, successfully incorporating an additional deliverable through proactive risk and schedule management.
- Oversaw task ownership and progress tracking across brand, UX, marketing, and design deliverables to ensure on-time project completion.

PERSONAL PROJECTS

The Haunt List — Haunted Attraction Directory

2025 – Present

Solo Project · React / Supabase

Vancouver, BC

- Identified a fragmented discovery experience within the haunted attraction industry and designed a centralized platform to help users search, evaluate, and save attractions across North America.
- Built a functional directory platform and independently managed the product lifecycle from market research and business modeling through development, testing, and pre-launch preparation.
- Developed supporting product artifacts including a Lean Canvas, traction model, pricing strategy, and go-to-market plan to evaluate business viability alongside product execution.

PROFESSIONAL EXPERIENCE

Customer Success & Strategy

Nov 2022 – Apr 2024

Haulix — Music SaaS Platform

Remote

- Spearheaded the restructure and go-to-market launch of HAULIX+, supporting a product offering that generated \$50,000+ in revenue during its first cycle.
- Worked directly alongside the CEO and engineering lead within a 3-person SaaS team, translating feedback from 500+ global clients into structured product insights during feature rollouts and deployment cycles.
- Identified recurring workflow friction points, documented user needs, and surfaced prioritized recommendations that informed product improvements and customer experience decisions.

Principal Consultant — Strategy, Delivery & Communications

Jan 2016 – Feb 2025

A12 Entertainment

Remote

- Founded and led an independent consultancy delivering campaigns, partnerships, and large-scale live experiences for clients including Live Nation, AEG, and Synergy Global Entertainment.
- Designed and implemented operational systems, documentation frameworks, stakeholder approval workflows, reporting processes, and team enablement materials to improve execution consistency and organizational efficiency.
- Built governance structures and decision-making frameworks to coordinate complex initiatives involving internal teams, external partners, media, vendors, and executive stakeholders.
- Directed cross-functional teams of up to 8 people across 50+ large-scale events and hundreds of campaigns, ensuring successful execution in high-pressure, time-sensitive environments.
- Secured national media coverage in Rolling Stone, Billboard, and Forbes through strategic planning, stakeholder management, and coordinated campaign execution.

Events, Partnerships & Career Development

Jan 2020 – Nov 2022

Musicians Institute

Los Angeles, CA

- Managed the end-to-end delivery of 120+ annual live and virtual events, coordinating planning, partner engagement, logistics, execution, and post-event evaluation.
- Built and maintained strategic partnerships with organizations including Warner Records, Capitol Records, Red Light Management, and major music industry brands.

- Served as a cross-functional liaison between industry partners, internal teams, students, and leadership to align objectives and deliver successful programs and experiences.
